Art Unit: 1742

1. The following is an examiner's statement of reasons for allowance:

Applicant's amendment canceling claim 21 and incorporating the subject matter of that claim into claim 22 obviates all outstanding rejections of the instant claims. With respect to claim 22, the prior art does not disclose or suggest a process that includes integrating a compacted cylindrical component made from a sintered contact material that includes 10% or more Fe base alloy, metallic Al, and 10-70% Cu with an iron-base cylindrical backing by interposing a third material between those two materials that will generate a liquid phase useful for bonding the contact material to the backing when heated, heating to at least 800.deg.C to expand the contact material and bond to the backing by utilizing a Cu base liquid generated at this temperature, and heating to at least 900.deg.C to generate more Cu base liquid to compact the contact material. With respect to claim 29, the prior art does not disclose or suggest a process similar to the above, but where instead of employing the third material, the backing is provided with a collar, and a wear-resistant material or the contact material is integrated with a sliding contact surface of the collar by brazing, sinter-bonding or infiltration simultaneously with the integration of the backing.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
